# WHAT'S NEW

# RUBBER BASE

Rubber Base is a foundation gel like no other. You can extend and strengthen the natural nail, with the ease of applying gel polish. Once you finish applying rubber base, you have the perfect base for your nail art creations. Paint it with Polish Pro for a polished look or use 3D embellishments to wow a client.

### TECH-GEL COLOUR GELS

Tech-Gel Colours are designed to give a maximum one coat, full coverage and cure to an ultra high gloss shine. This will cut down on your service time as well as products used.

# **BUILDER IN A BOTTLE**

A Hard gel System in a Bottle, with the strength you expect from the Balance Gel System. Balance Builder In A Bottle is a LED and UV curable hard gel system that you can use to extend the nail, natural nail overlays and more.

# ACRYLIC NAIL POW

## ATTRACTION ACRYLIC SYSTEM

Designed for effortless workability and flow with a spring back action and feel, unique to our industry. The powder is pigment rich, and allows the nail tech to customize for each client. Delivers exceptional adhesion, strength and flexibility.

## Conceal Powder ••

A pure peach cover powder with a glistening gold shimmer.

1302 40 g (1.41 Oz.)

### Pure Ice Powder

A transparent powder to encapsulate your nail art design.

1303 40 g (1.41 Oz.)

# ACRYLIC NAIL LIQUID

## Attraction Nail Liquid

Evaporates slowly, reducing odors for a pleasant salon and spa environment. Draws the powder to the brush for quicker and easier bead pick-up.

7123	118 mL (3.9 Fl. Oz.)
7124	240 mL (8.1 Fl. Oz.)
7126	946 mL (32 Fl. Oz.)
7127	Gallon (Four 32 Fl. Oz.)
7128	One Gallon Pack
	(Four 128 Fl. Oz.)

## Spa Nail Liquid

A superior odor-free sculpting monomer that delivers beautiful, long lasting enhancements without the scent of traditional EMA liquids. This monomer is the perfect enhancement addition for spas, salons and schools.

7402 59 mL (2 Fl. Oz.)

## Primerless Nail Liquid

Eliminate the use of a nail primer with this nail liquid without sacrificing the ease of use.

1317	100 mL (3.4 Fl. Oz.)
1312	200 mL (6.7 Fl. Oz.)

## Universal Nail Liquid

The original cross-linking monomer that creates tough, yet thin nail enhancements. Non-yellowing formula uses a UV shield to block out UV exposure to retain colour clarity, and keeps enhancements looking new. Perfect alternative for sensitive clients.

7104 236.6 mL (8.1 Fl. Oz.) 7106 946 mL (32 Fl. Oz.)

7107 Gallon (Four 32 Fl. Oz. Containers)

# WHAT IS SIMPLICITÉ?

With the awakening of an old technology using traditional cyanoacrylate dip systems, we wanted to bring this idea into the light cured era. We call it Simplicité, it's easy to use, easy to remove and easy to extend a nail or do repairs on natural nails. The beauty of Simplicité, is that it's unique formula bonds to the natural nail, absorbs the polymer and, once cured, stays strong, durable and flexible.

Simplicité is the perfect product for both spas and the beauty market. Simplicité is easy to learn and teach to new technicians. It is also an ideal product for transitioning clients from a gel polish manicure to nail enhancements. It has the polished look that clients love from gel polish, but the strength of a nail enhancement.

# WE ASKED THE PROS: Why Simplicité?

**Denise Wright**NSI Global
Educator, UK

NSI Global Educator, Canada

With the Simplicité PolyDip System, you can work all five fingers at the same time because there is no risk of product drying. Traditional resin dip systems only allow you to work on one finger at a time.

Easily maintain the NSI Simplicité PolyDip nail enhancement with regular infills.

Traditional resin dip systems need to be soaked off and redone every time.

Simplicité uses a unique formulated oligomer that absorbs the powder for fuller, even colour coverage. Traditional dip systems use a resin, which is an adhesive. The dip powder only sticks to the top layer.

Clients love that Simplicité feels like wearing polish, it doesn't feel tight on the nail like other dip systems. It does not have the polymer shrinkage that causes that tight feeling, like any resin based dip systems.

# DIPPING SYSTEM LIQUIDS

#### Prep

Quickly preps the nail before application of Essential Bond. 6760 15 mL (.5 Fl. Oz.)

# PolyBase

The LED/UV curable PolyBase makes the Simplicité System unique to other dip systems. Polybase does not air dry, it absorbs the dipping powder for a fuller colour coverage.

6762 15 mL (.5 Fl. Oz.) 6765 120 mL (4 Fl. Oz.)

#### French White

A LED/UV curable brush-on white for the perfect smile line with the Simplicité System.

6764 15 mL (.5 Fl. Oz.)

# PolyBase Opaque

Essential Bond (Acid-Free) primer is designed for use with your favorite NSI gel and acrylic systems.

6766 15 mL (.5 Fl. Oz.)

### **COLOURED POWDERS**

The Simplicite Acrylic Colour Powders are fine polymers, ultra pigmented, and designed for versatility. When dipped, the Simplicite Acrylic Colour Powders completely cover in just two dipping applications. Use with monomer for traditional acrylic applications like full colour overlay or for intricate 3D nail art designs. You can even mix them together to create your own unique colours!

# 40g Size

The Simplicite Acrylic Colour Powders are fine polymers, ultra pigmented, and designed for versatility. You can even mix them together to create your own unique colours!

# TRADITIONAL LED/UV HARD GEL

# BALANCE LED/UV GEL SYSTEM

The Balance LED/UV Gel System combines advanced light cured technology and precision products, to create a unique hard gel system. The Balance LED/UV Gel System is incredibly user friendly, and only hardens when cured.

## Body Builder Clear

# Dual Bure LED/UV Nail Lamp

- 30 bulbs evenly spaced for a proper cure.
- Cures all five fingers or toes at once.
- Never replace your bulbs again.
- Removable magnetic reflector tray.

# DUAL CURE LED/UV LAMP

A new nail lamp that cures both UV and LED products! The Dual Cure Lamp technology lets you choose between a UV or LED cure. Use both the UV and LED products you love, without purchasing multiple lamps!

#### Dual Cure LED/UV Lamp

5620 220 Volts 0563 110 Volts

#### Avoid Heat Spikes With Half Power

Many brands have increased the photo initiators in their gel products so that their products can cure in a range of lamps. When using a good lamp, however, this tends to make the heat spike more significant and the client can have pain during the curing process. None of the NSI products need the half power, but it's a selling point for those techs using other brands, and for sensitive clients.

### INSTRUCTIONS FOR HALF POWER:

The gels will need to cure for twice as long if you choose to change the wattage.

**To change wattage:** The lamp default wattage is 36W. Press and hold ON/OFF Button for 2 seconds to switch the power between 18W and 36W.

# GEL POLISH

# POLISH PRO GEL POLISH

A revolutionary gel polish formula that lasts 2-3 times longer than a natural nail manicure, without chipping, smudging or cracking. Polish Pro is light-cured, soaks off in minutes and is available in an ever-expanding array of shades.

Base & Top Coats

# TECH-GEL COLOUR GELS TACK-FREE AND ULTRA PIGMENT RICH. THE POSSIBILITIES ARE ENDLESS.

Tech-Gel Colours are designed to give a maximum one coat, full coverage and cure to an ultra high gloss shine. This will cut down on your service time as well as products used.

The Tech-Gel Colours have given us the best of both worlds. Opaqueness for full coverage with a bonus of art possibilities!

Dress up your mani with one of the Tech-Gel Colour Gels for a polished look. Perfect for adding a touch of colour, colour fades and nail art designs

# **NEW!**

## TECH-GEL GLITTER BASE

Tech-Gel Glitter Base can be used for a variety of nail art. From custom glitter mixes, to candy balls, even as a blooming gel. The possibilities are endless!

- Mix your own unique gels
- Use to Create Blooming Gel Art
- Create Candy Balls
- Show off your creativity and talent

8787 Tech-Gel Glitter Base

#### **CUSTOM GLITTER MIX GEL:**

- Using your Secrets Sparkles, choose either one colour or mix different shades of sparkles to customize. Be sure to mixed well together.
- 2. Be sure to use an opaque jar when adding in your **Tech-Gel Glitter Base**.
- 3. Squeeze out the **Tech-Gel Glitter Base** into the jar so that there is a ratio of gel to glitter of at least 2:1. You need to ensure there is enough gel for it to cure.
- 4. Using your brush, or metal tool, mix the gel into the glitter until evenly mixed and distributed. Now you have a custom glitter gel!
- 5. Using your **#5 Touch Tip Kolinsky Brush**, Gather a small amount of gel on your brush. Apply in polish style strokes to the nail.
- 6. Cure for 30 seconds LED or 2 Minutes UV.
- 7. Apply **Essential Seal** and cure for 30 seconds in LED or 2 minutes in UV.
- 8. Remove the tacky layer with a **Nail Wipe** saturated in **Cleanse**.

Create beautiful acrylic nail art with the new NSI Colour Kit. Vibrant colors bring your designs to life, and mix them together to create an entirely new color range.

6808 NSI Colour Kit

## **CRAVING EVEN MORE COLOR?**

If you are looking for more coloured acrylic choices, use the Simplicité Colour Powders! They are super fine coloured powders, and they can be used with your favorite NSI monomer. The NSI Colour Kit is our new special kit that shows you just how easy it is to use the Simplicité Colour Powders with Attraction Monomer.

#### Secrets Art Palette

6224 Includes fifteen 5 g (.18 Oz.) empty jars

6306 Empty Palette

## **BUILD YOUR PALETTE**

Organize your everyday favorites! This gorgeous palette can hold up to fifteen Secrets jars and is perfect for travel and to keep at your workstation. The jars can be easily removed so you can mix-and-match your favorite Secrets products!

# NAIL FILES

# Endurance 100/100

## Endurance 150/150

## Endurance 180/180

Endurance Buffer 180/240

#### 100/100 Grit File

The Endurance 100/100 Grit File is essential for shaping a nail enhancement for a rebalance or to remove product.

NOTE: This file should NOT be used on a natural nail plate.

3597 100/100 - Single 3604 100/100 - 50 Pack

#### 150/150 Grit File

The Endurance 150/150 Grit File is essential for shaping a finished nail enhancement. Ideal for filing and defining the shape of a finished nail enhancement.

NOTE: This file should NOT be used on a natural nail plate.

3598 150/150 - Single 3605 150/150 - 50 Pack

#### 180/180 Grit File

The Endurance 180/180 Grit File is essential for nail prep and gently shaping the nail. Ideal for blending nail tips and for filing to define the shape of a finished nail enhancement.

3594 180/240 Buffer - Single 3607 180/240 Buffer - 25 Pack

# NAIL BRUSHES

## #8 Royal Precision Brush

Made from pure kolinsky sable hair. Vented cap offers protection for the brush during storage and travel, while allowing air circulation and acts as a handle extender.

3520 #8 Royal Precision Kolinsky

#### #5 Touch-Tip Brush

The shorter handle allows the nail tech to work closer to the nail for greater sculpting precision. Recommended for use with gel systems. Made from pure, kolinsky sable hair.

3502 #5 Touch-Tip Kolinsky (Oval)

#### HD 3D Brush

A firm feeling brush with a pointed tip to enable detailed 3D designs and creativity.

1494

# #6 Baby Grand Brush

Ideal for creating of thin, beautiful, and properly designed nail enhancements. Smaller barrel is designed for less liquid pick-up. Made from pure, kolinsky sable hair.

3500 #6 Baby Grand Kolinsky (Round)

## HD Detailing Brush

A fine tipped brush perfect for delicate, easy and refined drawing. 1493

## #8 Grand Brush

Ideal for creating of thin, beautiful, and properly designed nail enhancements. Larger barrel allows for increased liquid pick-up. Made from pure, kolinsky sable hair.

3501 #8 Grand Kolinsky (Round)

# NAIL FORMS

## FITTING TECHNIQUES

An important part to sculpting with a nail form is to ensure a proper fit. The strength of a sculpted nail is only as strong as the fit of the form.

Before applying the form to your client's finger, try rolling your C-Curve into place. Approach the nail with your curved form and place it under the free edge of the nail. Place the bottom tabs together in the front and back evenly and then squeeze the bottom tabs tight. Squeeze the top of the nail form along your client's finger, this will help you create a very tight fit. A fitted form should look like images above.

#### SOME THINGS TO LOOK FOR:

- Is the form straight?
- Is it tight to eliminate seepage?
- Are you happy with your C-Curve?

#### Platinum Nail Forms

SKILL LEVEL: All

PRODUCT TYPE: Acrylic / Gel

LENGTH: All

PERFECT FOR: A Versatile Nail Form

Perfect for techs that need a versatile nail form. These forms are great form for sculpting all nail shapes. For gels: Apply a thin clear gel base layer under your enhancement, to ensure a complete cure.

3735 (300 Ct.)

#### Stiletto Nail Forms

SKILL LEVEL: Advanced PRODUCT TYPE: Acrylic / Gel

LENGTH: Long

PERFECT FOR: Next Level Nail Art

These forms are ideal for sculpting alternative nail shapes. Allows you to sculpt longer enhancements without doubling up forms. You can even use these forms for sculpting with gels.

1360 (300 Ct.)

# NAIL TIPS

# Precision Plus Nail Tips

Beautifully flatter and extend the nail, without the look of a bulky nail. The tips' side walls are softly tapered in, and the C-Curve is delicate but strong and flexible enough for a deeper more dramatic curve.

### Polybond Adhesive

Fast-drying, brush-on clear adhesive. Polybond is ideal for applying nail tips and nail art add ons because it holds strong and won't yellow the product or nail tip.

1140 7 mL (.23 Fl. Oz)

# ESSENTIALS PREP PRODUCTS

#### **Bond Enhancer**

PH Balancer

Bond Enhancer is not a nail primer, it works by balancing the pH level of the nails' surface to promote adhesion. Using Bond Enhancer as an added prep step adds extra adhesion.

0910 15 mL (.5 Fl. Oz.)

#### Seal

LED/UV Top Coat

Seal is a LED and UV curable top coat for your favorite products. Seal brushes on smooth to seal and protect the nail with a radiant high gloss finish.

8804 15 mL (.5 Fl. Oz.)

#### Bond

Acid-Free Primer

Designed for use with your favorite gel and acrylic systems. Bond primes the natural nail before application of product. Bond will not discolor the enhancement or burn the skin.

8800 15 mL (.5 Fl. Oz.)

#### Air Dry

Air Dry Top Coat

No lamp needed, just let Air Dry! Seals and protects polished nail enhancements in just 3 minutes. Apply after the application of polish and allow to Air Dry for an ultra-shiny, no-smudge finish.

8806 15 mL (.5 Fl. Oz.)

#### **Base Coat**

LED/UV Base Coat

Base Coat is a LED and UV curable base gel that provides exceptional adhesion to the natural nail. Base Coat prevents lifting, and improves the wear of hard gels and gel polishes.

8802 15 mL (.5 Fl. Oz.)

# GLAZE N GO

Glaze 'n Go LED Enhancement Sealant

Glaze 'n Go LED is a tack-free enhancement Top Coat for use over gel or acrylic services to save time on buffing and filing. Just Glaze, Cure and Go for a Tack-Free Shine!

5307 15 mL (.5 Fl. Oz.)

## Glaze 'n Go

**Enhancement Sealant** 

Brushes on like a polish, for a radiant, tackfree finish. Provides a long-lasting, scratchresistant high gloss shine, that cures in 90 seconds in any full hand UV nail lamp.

5301 15 mL (.5 Fl. Oz.)

5303 236.6 mL (8 Fl. Oz.) Refill

# Glaze 'n Go LED - Matte

Enhancement Sealant

Glaze N Go Matte Topcoat is an ultra silky, tack-free topcoat that cures Tack-Free in just 30 seconds in LED. This top coat leaves the nails with an amazing soft finish, the Matte finish you've been looking for.

5309 15 mL (.5 Fl. Oz.)

# Glaze 'n Go LED - Glistening

Enhancement Sealant

Add a little extra to your enhancements! Glaze N Go Glistening Topcoat adds a bit of sparkle to your finished nail enhancements, it's as easy as applying topcoat! Just Glaze, Cure and Go for a Tack-Free Shine!

5400 15 mL (.5 Fl. Oz.)

# Glaze 'n Go LED - Soft Pink

**Enhancement Sealant** 

Use Glaze N Go Soft Pink to add a little pink to your finished enhancement. Apply instead of a clear topcoat, and cure for 30 seconds in LED and off the client goes. There is no tacky layer to remove, an ultra shine that lasts!

5404 15 mL (.5 Fl. Oz.)

# **EASY BABY BOOMER**

After you have completed the enhancement, apply Glaze N Go Soft pink down 2/3rds of the nail. Do not cure. Apply Glaze N Go Glistening to the remaining part of the nail and blend the two colors together where they meet. Cure for 30 seconds in LED, and you're done! There is no tacky layer or dry time once cured!

# MISC. PRODUCTS
